

## CLONING SAMPLES

Step 1 - Original with Braddock & Stella. Jimmy at an angle

Step 2 - Paul & Nena cloned in

Step 3 - we got in

Step 4 - Lillian last

The final, cropped slightly to mainly remove the lower skirt (violet plaid) skirt of Nena because in the original pix I used, she was partly standing before a large stone, and I had to first clone in the other half of the skirt, which came out not looking too natural. In retrospect, both cloned-in couples were too dim; should have been darkened. That's something I think Adobe can do in situ, using a loop outline drawn around the face? Don't have have it in Corel. Also, Jimmy's "halo" could have been avoided. I believe I did a slight Gaussian blur on the final. Next project will be a group pix of us all.
