

OLD COLOR PHOTOS FROM SOME YEARS BACK

In the mid to late 1990s, a group of us Los Angeles based engineers got together on a number of occasions at the residences of Danny Gil, Manny Ciriaco, Ben Eungenio, David Unson, etc for camaraderie and fellowship, especially when visiting friends were passing through, such as Tigi Barcelona, Sonia Valenzuela Quast, Elvira Supleo Ferrer, and others. The photos below are from such parties; some were mixed groups with Barbarians mingling with Upscans, and Betans. Now, about 18 years later, many are still identifiable, when so indicated, but many aren't (also for lack of space). You folks can try guessing.
