

ARRIETA FAMILY TREE

Version 3 – 20 June 2016

INTRODUCTION:

This is one of the standard print-outs of the Family Tree Maker Genealogical Software.

The print-out is generated from data encoded in the Genealogical Project, a database of various family trees. The Arrieta branch came mainly from Chito and Sonie Banogon-Arrieta whom we interviewed. Their data was merged into the database, now totaling over 27,000 names.

Unique in this database is that each individual has been assigned a birth year, which is an educated guess based on date interpolation using assumptions of sibling spacing, and child-bearing years. Such dates are prefixed by Abt (about). Where an exact date is known, the birth years of the siblings, parents and children are adjusted accordingly. Still, many of the dates may be significantly off, since the order of births of siblings may be inaccurate, and/or incomplete.

The format of the print-out is as follows:

1. Arabic numeral prefix to each name is a unique number for each individual.
2. Names with a hash # prefix means that the name will appear again in later generations, in reference to their children.
3. Roman numeral prefix is the order of birth for siblings.
4. Small superscripted numbers indicate generational level of individuals.
5. Parenthesized names after emboldened name are forebears or bloodline of individual.
6. All years shown are estimated birth and/or death years when prefixed by Abt (about).
7. Where full names are unknown, XXX are used, or other descriptive titles.

Next portion is an Index with all alphabetized names and their reference numbers.

We enjoin the clan members to make corrections/updates as may deem fit, such as filling in the correct names, years, additional children and/or siblings, preferred deletions, etc. If sent back to <ferngil@aol.com>, we will update the database and reissue a new printout.

An interactive but simplified version of this tree is posted on the internet via the link below.
