INTRODUCTION:

This is one of the standard print-outs of the Family Tree Maker Genealogical Software.

The Introduction and Index is edited in.

The print-out is generated mainly from data we encoded into a genealogical database project to trace the inter-relational linkages between major families in the Negros Oriental area by bloodline and marriage. The bulk of the information comes from the “Genesis” book, which was researched, collated and published by Manuel “Manny” Dionaldo of La Libertad, for use in the clan’s reunion a few years ago in La Libertad. Other sources include more updates and additions from emails, volunteered hardcopies, and internet files of other family trees, some of whose members overlap this clan. A recent email from Emerald Andales of the Absin-Baya branch gave more data, and correct birth years

Unique in this database is that each individual has been assigned a birth year, which is an educated guess based on date interpolation using assumptions of sibling spacing, and child-bearing years. Such dates are prefixed by “about”. Where an exact date is known, the birth years of the siblings, parents and children are adjusted accordingly. Still, many of the dates may be significantly off, since the order of births of siblings may be inaccurate, and/or incomplete.

A notable item is this family tree is that the grand old man Hipolito Facturan who started it all had six daughters and one son. All the daughters and their descendants carried the surnames of their husbands. The lone male did not marry, and though reportedly had a partner, did not sire any known offspring.

Hence the Facturan name is carried by so few.

The format of the print-out is as follows:

1. Arabic numeral prefix to each name is a unique number for each individual.
2. Names with a hashtag # prefix means that the name will appear again in later generations, in reference to their children.
3. Roman numeral prefix is the order of birth for siblings.
4. Small superscripted numbers indicate generational level of individuals.
5. Parenthesized names after emboldened name are forebears or bloodline of individual.
6. Where full names are unknown, XXX are used, or descriptive titles.

We enjoin the clan members to make corrections/updates as may deem fit, such as filling in the correct names, DOBs, additional children and/or siblings, preferred deletions, etc. If sent back to <ferngil@aol.com>, we will update the database and reissue a new printout.

Next portion is the index which lists all the members alphabetically, and their corresponding reference number.

Last three pages show the ancestry of the youngest member of the clan.

This family tree also is viewable in various formats if you click on the website below:
