

# FERRER FAMILY TREE

originally of Pangasinan  
Version 18 - 10 May 2015

## INTRODUCTION:

This is one of the standard print-outs of the Family Tree Maker Genealogical Software.

This Intro and the Appendix are edited in.

The print-out is generated from data the undersigned encoded into a Genealogical Project Database from information taken from the Ferrer Family Tree Genealogy Book of 1995, and from recently submitted updates from members preparing for the 2015 Ferrer reunion.

The format of this print-out is as follows:

1. Arabic numeral prefix to each name is a unique number for each individual.
2. Names with a # prefix means that the name will appear again in later generations, in reference to their children.
3. Roman numeral prefix is the order of birth for siblings.
4. Small superscripted numbers indicate generational level of individuals.
5. Parenthetized names after emboldened name are forebears or bloodline of individual.
6. All years prefixed by about are estimated dates based on date extrapolation using logical assumptions of marriage age, sibling spacing, etc.
7. Where full names are unknown, XXX or other descriptive identities are used.

We enjoin the clan members to make corrections/updates as may deem fit, such as filling in the correct names, DOBs, additional children and/or siblings, preferred deletions, etc. If sent back to <ferngil@aol.com>, we will update the database and reissue a new printout. Additionally, we can also printout other reports such as Ancestry Trees, Kinship Reports, etc.

Last portion is the index which lists all the members alphabetically, and their corresponding reference number.

Newer editions of the family tree are posted periodically on the internet on the link below. The Ferrer family Tree is #14 among a list of many others. This is a downloadable PDF file.

It is also posted as a Genealogical Project in the interactive mode, with various view formats.
