

JUAN FAMILY TREE

Version 2 – 30 January 2017
of Ilocos Norte, Philippines

INTRODUCTION:

This is one of the standard print-outs of the Family Tree Maker Genealogical Software.

The Introduction and Index were edited in.

The print-out is generated from data as encoded into a genealogical database from the information taken from the Wordstar files of the Juan Family Tree, first researched and collated by Generoso Gil and Avelina Juan-Gil starting from the 1970s, and updated by the Romy Juan Ganiron clan in preparation for a Juan Family reunion in Los Angeles in the late 1990s.

Latest updates were from data sent by Jane Andres Juan-Soterakopoulos of Seattle on her Eusebio Bumanlag Juan branch.

Unique in this database is that each individual has been assigned a birth year, which is an educated guess based on date interpolation using assumptions of sibling spacing, and child-bearing years. Such dates are prefixed by the word "about". Where an exact date is known, the birth years of the siblings, parents, children and spouses are adjusted accordingly. Still, many of the dates may be significantly off, since the order of births of siblings may be inaccurate, and/or siblings are incomplete.

The format of the print-out is as follows:

1. Arabic numeral prefix to each name is a unique number for each individual.
2. Names with a hashtag # prefix means that the name will appear again in later generations, in reference to their children.
3. Roman numeral prefix is the order of birth for siblings.
4. Small superscripted numbers indicate generational level of individuals.
5. Parenthesized names after emboldened name are forebears or bloodline of individual.

We enjoin the clan members to make corrections/updates as may deem fit, such as filling in the correct names, birth and death years, additional children and/or siblings, preferred deletions, etc. If sent back to <ferngil@aol.com>, we will update the database and reissue a new printout.

Last portion is the index which lists all the members arranged alphabetically, and their corresponding unique ID number.

An interactive but simplified version of this tree is posted on the internet via the link below.
