

ONG FAMILY TREE

Version 1 - 22 Nov 2015

INTRODUCTION:

This is one of the standard print-outs of the Family Tree Maker Genealogical Software.

This Intro and the Appendix are edited in.

This print-out is generated from info the undersigned encoded into the Family Tree Maker software (FTW) from the data that family friend Monet Ong supplied over a period of time while exchanging emails with him and his siblings.

One of my hobbies is genealogy, and I find it challenging in tracing linkages between various clans.

Their family is especially interesting because their forebears come from China, and some of them settled in the small town of Ibajay, where my wife's kin come from. We still are trying to trace a connection.

Let me quote excerpts from Monet, who is a retired Brigadier General of the Philippine army.

I am sending you genealogy info -- only from my (and Jimmy's) father Juan and mother Adelaida, plus their descendants. My father had several FULL brothers and sisters. He also had several half-brothers and half-sisters (100% Chinese), because my Lolo (Angel Ong) already had a complete family (wife and children) in Amoy, Fujian Province, China -- before he migrated to the Philippines (Ibajay, Aklan), where he married my Lola (Maria Salido).

My Lolo Angel has a grandson in mainland China who joined the Chinese Army and rose to the rank of General. So now, there are 2 General Ongs in 2 different Armies, who are half-first cousins. Complicated, n'est-ce pas? Have fun with the data below. If you need more info -- like the other children of Angel Ong and Maria Salido Ong (full brothers and sisters of Jimmy) -- just let me know.

So I took up the challenge and asked for more data.

And as is my practice, I assigned interpolated or "guestimated" birth years to each person, based on logical assumptions of marriage age, child-bearing years and sibling spacing. When guestimated, the birth year is prefixed by "about". Where a definite birth year is known, I make adjustments to the siblings, parents and children to refine the estimates.

Still, the dates could be significantly off, as there may be missing siblings, or the birth order is not correct.

The format of this print-out is as follows:

1. Arabic numeral prefix to each name is a unique number for each individual.
2. Names with a # prefix means that the name will appear again in later generations, in reference to their children.
3. Roman numeral prefix is the order of birth for siblings.
4. Small superscripted numbers indicate generational level of individuals.
5. Parenthesized names after emboldened name are forebears or bloodline of individual.
6. Where full names are unknown, XXX or other descriptive identities are used.

We enjoin the clan members to make corrections/updates as may deem fit, such as filling in the correct names, DOBs, additional children and/or siblings, preferred deletions, etc. If sent back to <ferngil@aol.com>, we will update the database and reissue a new printout. Additionally, we can also printout other reports such as Ancestry Trees, Kinship Reports, etc.

Last portion is the index which lists all the members alphabetically, and their corresponding reference number.

Newer editions of this family tree, among others, may be are posted periodically (as evidenced by the version numbers) on the internet on the link below.

The family tree also is merged into the Genealogical Project, a large database now at about 34,000 names, viewable on the internet. It is presented in the interactive mode, with various view formats. This project is a public service of the Tanjay Association and is aimed at linking as many of the Philippine clans as possible.
