INTRODUCTION:

This is one of the standard print-outs of the Family Tree Maker Genealogical Software.

The print-out is generated from data we encoded into the Database from the MSWord files of Rene Capilla Gayo, who did the original research and collation of data of the Silva lineage, and provided the data to us. These were merged with Database gathered over the years from other sources.

Updates are periodically made and posted as evidenced by the version numbers.

Approximated birth years were added based on “guestimates” and interpolation based on logical assumptions of marriage age, child-bearing ages and spacing of children.. Where an exact date is known, birth years are adjusted accordingly for immediate family members. Still, birth years can be significantly off, since the order of birth of siblings could be wrong or some siblings missing.

The Database is a project to trace the inter-relational linkages between major families in the Tanjay area, by bloodline and marriage.

The family tree is also available on the internet in the Tribal Pages website with URL below. It is an interactive site with various views of family members, as linked into the Genealogical Project of about 34,000 names.

<http://tanjaygenealogicaldatabase.tribalpages.com/tribe/browse?userid=tanjaygenealogicaldatabase&view=6&pid=6446&ver=26140>

The format of the print-out is as follows:

1. Arabic numeral prefix to each name is a unique number for each individual.
2. Names with a hash # prefix means that the name will appear again in later generations, in reference to their children.
3. Roman numeral prefix is the order of birth for siblings.
4. Small superscripted numbers indicate generational level of individuals.
5. Parenthetized names after emboldened name are forebears or bloodline of individual.

6. All years shown are estimated date of births (DOB) when prefixed by “about.
7. Where full names are unknown, XXX or other descriptive word is used.

We enjoin the clan members to make corrections/updates as may deem fit, such as filling in the correct names, DOBs, additional children and/or siblings, preferred deletions, etc. If sent back to <ferngil@aol.com>, we will update the database and reissue a new printout.

Last portion is the index which lists all the members alphabetically, and their corresponding reference number.
