

SITYAR FAMILY TREE

Version 2 –13 July 2014

INTRODUCTION:

This is one of the standard print-outs of the Family Tree Maker Genealogical Software.

The print-out is generated from data as encoded into the Genealogical Project Database, built up from various sources over the years. The project aims to trace the inter-relational linkages between selected families. The internet link to the Tribal Pages website is shown below:

<http://tanjaygenealogicaldatabase.tribalpages.com/>

Within that database are over 130 Family Trees, with over 30,000 individuals.

This printout focuses only on the SITYAR FAMILY Tree. <http://tinyurl.com/jga92bk>

Majority of the data in this Family Tree was pieced together from email exchanges between Frank Almonte Sityar, Rory Sityar Abrera, Gigi Gonzales Matias and Manny Sityar, and from miscellaneous Face Book postings, plus some research on the internet. A good portion of the initial data came from a book published in the 90's "Memorias Intimas" by historian Almario wherein the index shows about 16 Sityars and their 76 offspring with spouses. Unfortunately, the listing is vague about how all of them are inter related, and certain logical assumptions and conjectures had to be made in building up the family tree.

In this database, each individual is defined by at least a first name and family name (nicknames are with quotation marks, and married females are shown with their maiden names), and a birth year. Where the exact the birth year is unknown, the data is "guestimated" by date interpolation, based on logical assumptions on child spacing, typical marriage age, and child-bearing ages.

A more recent Tribal Pages website was set up dedicated to the Sityar family. It has more photos, birth data, and historical sketches:

<http://royalsityar.tribalpages.com/>

The format of the print-out below is as follows:

1. Arabic numeral prefix to each name is a unique number for each individual.
2. Names with a hashtag # prefix means that the name will appear again in later generations, in reference to their children.
3. Roman numeral prefix is the order of birth for siblings.
4. Small superscripted numbers indicate generational level of individuals.
5. Parenthesized names after emboldened name are forebears or bloodline of individual.
6. All years shown are estimated date of births (DOB) when prefixed by "about".
7. Where full names are unknown, XXX or YYY are used, or other descriptive titles.

We enjoin the clan members to make corrections/updates as may deem fit, such as filling in the correct names, DOBs, additional children and/or siblings, preferred deletions, etc. If sent back to <ferngil@aol.com>, we will update the database and reissue a new printout.

Last portion is the index, showing all the names in the Sityar bloodline with their corresponding reference number, and then a separate list of their spouses and partners.

This Introduction and the Index has been edited into this printout. The bulk and main portion is a standard print format of the software.
